Standardization Administration of the People's Republic of China

CONTENTS

Foreword	I
1 Scope.....	1
2 Normative References	1
3 Terms and Definitions.....	1
4 Classes and Type Determination of Road Illumination Devices	1
4.1 Classes of Headlamps	1
4.2 Criteria for Determination of the Same Type of Headlamps	2
5 Technical Requirements.....	2
5.1 General Requirements	2
5.2 Color of Light and Colorimetry	3
5.3 Light Source Requirements.....	3
5.4 Stability of Photometric Performance of Headlamps.....	4
5.5 Headlamps Incorporating Lenses of Plastic Material.....	4
5.6 Headlamps Using LED Light Sources/Modules.....	4
5.7 Photometric Characteristics	4
6 Test Methods.....	14
6.1 General Requirements for Test Darkroom and Equipment.....	14
6.2 Voltage for Photometric and Colorimetric Testing.....	15
6.3 Aiming During Photometric Test.....	17
6.4 Headlamps Grouped or Reciprocally Incorporated with Front Position Lamp	17
6.5 Headlamps with an Adjustable Reflector	17
6.6 Bend Lighting Device Test.....	18
6.7 Colorimetric Test	18
6.8 Test Methods for Other Items.....	18
7 Inspection Rules	18
7.1 Type Test.....	18
7.2 Conformity of Production (CoP) Check	20
8 Implementation of This Standard	20
Annex A (Normative) Voltage Markings	21
Annex B (Normative) Reference Center Marking	22
Annex C (Normative) Requirements for LED Light Sources/Modules and LED Headlamps	23
Annex D (Normative) Test for Stability of Photometric Performance of Headlamps	26
Annex E (Normative) Requirements for Headlamps Incorporating Plastic Lenses - Testing of Lens or Material Samples and of Complete Lamps.....	31
Annex F (Normative) Aiming of the Cut-off Line of Symmetrical Passing-Beam Headlamp and Its Quality Requirements.....	35
Annex G (Normative) Aiming of the Cut-off Line of Asymmetrical Passing-Beam Headlamp and Its Quality Requirements.....	37
Annex H (Normative) Illumination Modes of Tests for Stability of Photometric Performance.....	41
Annex I (Normative) Test Sequence of Lens or Material Samples and Complete Lamps for Headlamps Incorporating Plastic Lenses	44
Annex J (Normative) Method of Measurement of the Diffusion and Transmission of Light.....	46
Annex K (Normative) Mechanical Deterioration Test Procedure	48
Annex L (Normative) Adhesive Tape Adherence Test.....	49

Road Illumination Devices for Motorcycles and Mopeds

1 SCOPE

This document specifies the classes and type determination, technical requirements and inspection rules of road illumination devices for motorcycles and mopeds, and describes the corresponding test methods.

This document is applicable to the road illumination devices for motor vehicles of Categories L₁ to L₅, e.g., passing-beam headlamps, driving-beam headlamps, adaptive driving beam (ADB), etc.

2 NORMATIVE REFERENCES

The following normative documents contain provisions which, through normative reference in this text, constitute essential provision of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendment) applies.

GB 4785	Prescription for installation of the external lighting and light-signaling devices for motor vehicles and their trailers
GB 18100	Provisions for the installation of lighting and light-signaling devices for motorcycles and mopeds
UN R37	Uniform provisions concerning the approval of filament light sources for use in approved lamps of power-driven vehicles and of their trailers
UN R99	Uniform provisions concerning the approval of gas-discharge light sources for use in approved gas-discharge lamp units of power-driven vehicles
UN R128	Uniform provisions concerning the approval of light emitting diode (LED) light sources for use in approved lamp units on power-driven vehicles and their trailers

3 TERMS AND DEFINITIONS

For the purpose of this document, the terms and definitions established in GB 4785 and GB 18100, as well as the following apply.

3.1 road illumination device (RID)

a unit or a group of units used to illuminate the road and objects in the vehicle forward direction to achieve one or more functions

Note: It includes passing-beam headlamp, driving-beam headlamp and ADB, as well as additional lighting unit

3.2 additional lighting unit

a constituent part of the RID and mainly providing the bend lighting for motorcycles

Note: Additional lighting unit generally consists of optical, mechanical and electrical components.

3.3 secondary driving-beam

a driving beam that operates together with the passing beam to achieve the driving-beam lighting effect

4 CLASSES AND TYPE DETERMINATION OF ROAD ILLUMINATION DEVICES

4.1 Classes of Headlamps

4.1.1

For headlamps emitting a symmetrical passing beam and/or a driving beam, the passing beam is of Class BS, Class CS or Class DS, while the driving beam is of Class BS, Class CS secondary driving-beam or Class DS secondary driving-beam; the use of Class A or Class B driving beam is also permitted.
